Theory of Change

If we create leadership teams to have a group to lead system change, then develop the knowledge/ skills of the leadership team members so that high quality PD and TA activities based on adult learning principles are accessed and utilized by EI teams to ensure improved adherence to an accurate and reliable COS process and enhanced use of EBPs by the El workforce,

then families
will be more
engaged
participants in
their early
intervention
services and
more prepared
to facilitate
their children's
development

which will lead to improving children's acquisition and use of knowledge and skills

Policies and procedures that support performance
